## materials handling

### Worldwide Material Handling Developments

Turnkey Engineering Design and  
Manufacture of Stock Yard Equipment

Design and Manufacture of  
Train Unloading Systems

Refurbishment

Site Inspection

Service and Spares

Engineering Services

### Train Unloading Systems

Rajpura, India

World Leaders in Train Unloading Using Rotary and Side Unloading Wagon Tippler / Car Dumper Systems.

A modular, efficient and non-compromising approach to a traditionally bespoke and non-standardised industry.

System capacity up to and exceeding 10,000 tonnes per hour for any commodity type and size.

Designs to handle all sizes of wagons and trains in all country railway systems throughout the world.

Equipment structural life exceeding 25 years / 6 million cycles.

Turnkey design and/or manufacture including all engineering disciplines; mechanical, electrical and civil.

Saldanha Bay, SouthAfrica

### Stockyard Equipment

Visag, India

Based on our knowledge of Stockyard equipment installed worldwide, Ashton Bulk have developed a range of machines that can be installed with minimal modifications to suit plant requirements. This includes:

Stacker Reclaimers

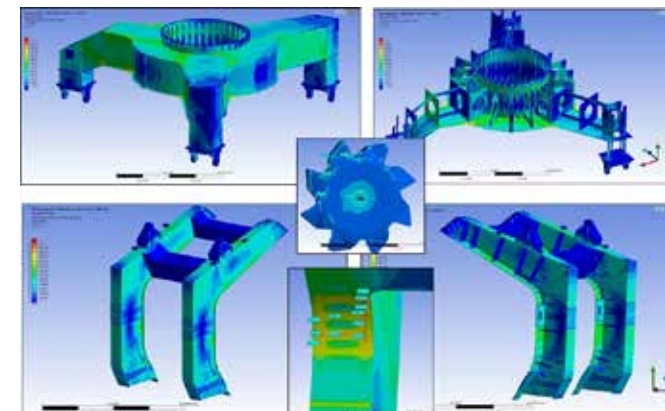

Slewing/Luffing Boom Stackers

Bucket Wheel Reclaimers

Barrel Reclaimers

Wheel on Bridge Reclaimers

Ducking Tripper System

## Engineering Services

### Engineering & Quality

Mechanical & Structural Engineering Design

Electrical Engineering & Software Design

Quality Assurance & Inspection Services

Manufacturing, Installation & Aftermarket Support

Procurement & Supplier Expediting Services

### Project Management & Supply Services

Our project managers and procurement personnel have extensive international supply chain manufacturers and partners to ensure a high level of service.

### Consultancy

Ashton Bulk provide consultancy services for projects worldwide, particularly in the field of Train Unloading Systems.

Where the performance and reliability is critical, we ensure equipment is specified at reasonable cost whilst complying with established codes of practice, and maintaining performance, redundancy and availability.

## Site Inspection and Surveys

Ashton Bulk can provide qualified engineers to undertake inspection and surveys of existing equipment in any part of the world.

## Spares

Experience in supply and procurement in international markets including India, China, Europe and North America.

Ashton Bulk can source and deliver spare parts for any number of machines, irrespective of the original supplier.

## Service / Refurbishment / Enhancement

As a result of working in the industry for over 40 years, the Ashton Bulk team can offer advice on refurbishment of legacy equipment to extend the life span and efficiency of the machine. The team have extensive knowledge of stockyard equipment and are able to offer solutions to efficiency issues by operating a modular approach to design

## ashton bulk materials handling

Working with us means that you are assured of customer care. Our company ethos requires us to look after our customers in a responsible and professional manner. Ashton Bulk invests heavily in the well being and competence of its entire workforce. Training and professional development are paramount to the fulfilment of the companies mission statement.

### About Ashton Bulk

Ashton Bulk provide bespoke medium to heavy engineering solutions for the Mechanical Handling and Bulk Materials Handling Industry.

Since inception in 2010, our engineers, project managers and administrative staff, a team with over 300 years experience in this industry, have provided designs and equipment to a broad range of clients in worldwide locations.

Concentrating primarily on materials handling equipment and specialising in the field of Wagon Tippler Train Unloading Systems following decades of experience designing such equipment for Strachan & Henshaw (UK) Ltd. Our expertise in this field is second to none with several international original equipment manufacturers incorporating Ashton Bulk designs into their turn key projects. All Ashton Bulk designs are engineered to the most stringent international standards and do not compromise on quality, reliability, availability or service life.
